What does this course offer you?

In this course, you will learn both the basics and advanced functions of PowerPoint 2010. You will create presentations, use various types of slide and gain experience of working with the individual presentation elements. In doing so, you will create charts and organizational charts. In addition, you will work with various templates and designs. You will design professional-looking presentations with integrated graphics and images and individually-designed texts. The course ends with dealing with collateral and various print functions.
