Word 2010 — Advanced

What does this course offer you?

In this course, you will learn advanced techniques for working with Word 2010. You will work with designs, AutoText and lists. You will compose larger documents with headers and footers, page numbers, foot and endnotes and directories. In addition, you will develop graphics and integrate objects into your documents. Style sheets and document templates will help you to guarantee a uniform layout for your Word documents and to create templates for your standard letters. Watermarks, the recovery function and building blocks will also be introduced in this computer-based training.

The primary subject matter of the course:

**Advanced Editing**
- Using text effects
